#### **DETAILED ACTION**

### Claim Objections

- 1. Claims 1-11 and 13-18 are objected to because of the following informalities: "An automatically adjusting self tightening wrench" is improper, it may be replaced with, -- A self-adjusting tightening wrench--.
- 2. Regarding claims 3, 4, 8, 10, 11, 12, 15, and 18, "finger depressed means" is improper. A rejection under 35 USC 112, second paragraph for indefinite language in failing to meet 35 USC 112, sixth paragraph requirements to recite a claim element as a means for performing a specific function, is avoided, since it is clear from the specification that the Applicant is attempting to claim a finger actuated jaw opening means, i.e., 50.

Appropriate correction is required.

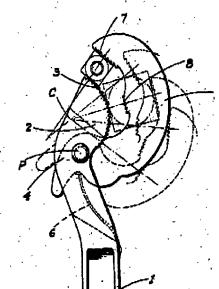

#### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1-11 and 13-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Mead, US Patent No. 2,028,406.

Mead discloses all the limitations of claim 1, in Figs. 1 and 2, i.e., a handle (1) having a working end (2) and a gripping end (lower portion), a jaw member (5) rotationally attached to the handle at a fixed point (P), said working end having a continuously curved handle face (3) making a smooth arc centered about (C)

adjacent to pivot point, jaw member having a planar surface (7), biasing means (6) to bias the planar face toward the handle face, the planar face following a generally circular path around the pin with a maximum distance from the curved handle face when the jaw is rotated from a first point at a minimum distance.

Regarding claims 2-11 and 13-18, Mead meets all the limitations, i.e., gripping surfaces for both jaws, jaw (5) having finger engageable surface to overcome the spring (6), jaw (5) formed in a slot in the handle adjacent to the pin, jaw (5) having two struts angled relative to each other, one ending at the pin and the other with the planar surface.

## Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

## Response to Arguments

**6.** Applicant's arguments with respect to claims 1-18 have been considered but are moot in view of the new ground(s) of rejection.
